APPENDIX E. LOUISIANA PUBLIC RECREATION SERVICE PROVIDER SURVEY 2014

Louisiana Public Recreation Service Provider Survey 2014

How do you regularly communicate with residents in your community, served by your agency, about recreation places and activities? (OTHER)

- billboard
- Custom Programming
- Face Book
- Face Book
- Face Book and social media; monthly board meetings;
- organization newsletter
- Outdoor Marquee
- posting of notices at town hall
- Public Meetings
- social media
- social media
- Social media

If most of your community public recreation places are not ADA-accessible, what factors make them inaccessible? (OTHER)

- All trailheads on the Teche: Implementation has not begun
- Burden Woods Trees and Trails: lack of funds to purchase materials for surfacing trails
- Duncan Park: No sidewalks
- Japanese Plank Walk: Down a hill and steps up and down across a stream
- Municipal Pool: Everything built in 1930's and never updated
- Observation Bridge: One step up
- parks: not handicap accessible for children
- Public Spaces and Facilities: Not ADA Compliant
- restrooms: door openings and floor space
- Sports Complex: No sidewalk access, limited restroom facilities
- Sports Complex: No sidewalks
- swimming pools: steps only, no ramps; no lift
- Use of Sports Park: Renting out of park to private venues, public restrooms are locked. Porta Potties don not
 provide adequate access.
- Walkways, paths, and parking areas: Not fully accessible for handicap
- Wilderness/Wildlife areas: Nature
- Woodland Park: No sidewalks
- Woodland Park: No sidewalks

Which passive recreation facilities does your agency provide? (OTHER)

- 700 foot long boardwalk
- breweries, distilleries, botanical gardens
- Nature Trail near a creek
- Observation tower, Bird Blind, board walk
- Walking Lane
- walking paths, bird watching
- Walking Trail
- Walking trail
- Walking Trails
- Walking trails
- walking/bike trials
- wetlands

Where does your agency provide aquatic facilities? (OTHER)

- 2 acre pond
- Splash Pad

Where does your agency provide fishing facilities or access? (OTHER)

- boat launch
- Lakefront Promenade and seawall; piers

Where does your agency provide aquatic/ paddling facilities or access? (OTHER)

riverfront parks

Where does your agency provide camping? (OTHER)

- camp ground
- Police Jury owned site
- Scheduled

Where does your agency provide hiking/ walking/ jogging/ running opportunities? (OTHER)

- city park
- lakefront promenade and board walk, riverside park and trails, tuten park and trails, drew park and trails; other recreational facilities
- Running Tracks at Stadiums
- trails and open space on our grounds
- trails on land owned by the parish
- West Bay Wildlife Management Area

Where does your agency provide bicycling opportunities and facilities? (OTHER)

- designated bike path project is nearing construction phase
- our grounds
- Skate park

What facilities or natural resources would you consider the most "in demand" in your area? (OTHER)

- canoe/kayak trails
- Dog parks
- Indoor Facility for Gymnastics
- OUTDOOR ADULT FITNESS SITES
- Rodeo/4H Events

What reasons do you think prevents residents and visitors within your area from participating more in outdoor recreation? (OTHER)

- advertising budget
- exercise equipment
- Have to drive to 1/2 mile away playground because it is too dangerous to bike or walk there- there are no crossings and limited sidewalks
- Individual time
- Lack of advertisement
- Lack of Options or diversity
- Lack of programming
- Lack of public input for a rural parish
- Need another quad in order to have events more often(baseball/softball fields)
- No indoor buildings
- Residents are older
- Unmotivated
- video screens

If you checked physical limitations/lack of access as preventing more participation, can you provide further explanation of the specific issues?

- I think the park closes to early
- Memorial Stadium (railroad and interstate barrier)
- N/A
- need to identify in social media
- not having all open areas open for other reasons
- Residents are mostly over 65 and don't want to walk on the trails. Younger residents have no issues. The
 gate is closed, but not locked, and needs a sign to welcome visitors to open the gate. This is due to past
 vandalism after dark by younger people.
- Scenic natural streams, but no organized public area. Large summer crowds gather on local sand bars with
 no restrictions or regulations, causing law enforcement concerns and safety issues. No public, easily
 accessible boat launches on these streams and creeks because most lands are under private lease.
- Special Needs community has requested additional upgrades for the mobility impaired
- we are planning stages of construction of skate park and regional sports park
- We do not have needed facilities
- We have four parks and two boat launches, but none of these are easily accessible to pedestrians and bicyclists. Many residents say they would like more opportunities to walk safely to work or the post office and grocery. Other residents say they want a covered facility where they can walk or run laps. The recreation department is mostly accessed by car. There is a small sidewalk leading from a neighborhood to the facility, but it is isolated and overgrown with grasses and underbrush, so most parents don't let their children walk it alone.

If you checked facility maintenance concerns as preventing more participation, can you provide further explanation of the specific issues?

- budgetary constraints result in deferred maintenance
- design and age of facilities prevent routine maintenance
- facilities need upgrading
- · Having the budget to maintain facilities year after year
- No funds from local parish body for maintenance of these public areas.
- Not enough routine maintenance done on facilities
- rec trails and other similar grants have money for facility construction but rec districts have trouble with added facilities and keeping up with maintenance
- The area is small and will not accommodate the children.
- Trails should be clearly marked and include distances.
- vandals create the perception of unsavory activities and will cut fences or destroy lighting, in some very
 specific parts of town it is difficult to keep up with these activities

If you checked lack of needed improvements as preventing more participation, can you provide further explanation of the specific issues?

- Area swimming pool needs improvements
- Available monies
- Expressway Park: Playground update and security (lighting)
- Funding for such a large project is not easily attained
- Funds for improvements
- Having the budget to build needed improvements
- I work with a number of communities and each community has different needs. However, generally, each
 community has needs which are not being met at this time, especially in the way of nature trails, wildlife
 viewing, etc..
- Lack of room for programs
- Multi-lingual signage and safe, public tent (low impact) camping are needed
- N/A
- Need basketball nets and courts redone
- need money to fund
- Need more family activities that parents can do with children. We have limited playground equipment/locations. No public fishing ponds. No summer time water activities. We are about to lose our only baseball fields truly open to the public for use at any time.
- needed improvements to the trails
- no funding for enclosed facilities for aquatic pool or just indoor activities
- No public pavilions, cabins, or public boat launches exist for input or takeout of small boats for fishing or sightseeing.
- of the over 30 parks spaces in the system, we overhauled about 10 in the last few years with Bond financing, continued public support to help fund improvements will be used wisely
- Only in the last few years have we developed an understanding that recreation facilities need to be maintained and renovated over time. Residents actually thought they had state-of-the-art facilities, although our gym was built in 1959, our pool in the 1930's, and most of our parks in the 1940's and 1950's. Until recently, these facilities had not been updated since that time.
- regional sports park will accommodate lots of amenities but total costs will require project be spread out over 10 or more years
- Sports Park director does not have public buy-in. Her vision is just that, hers.
- The park needs a gym and football field
- There is a shortage of tennis courts to meet the current demand. In addition, both expansion of tennis and baseball facilities would open the ability to host tournaments.

If you checked other as preventing more participation, can you provide further explanation of the specific issues?

- A public State Park would be an economic benefit along the Calcasieu River where large summer crowds come for swimming.
- bike lanes and dedicated trails are expensive 100k max is not enough
- It would help the older children of our area
- Lack of options or diversity
- Need more access within walking distance, we need more volunteers like some rec centers have the Grandparents Corps
- Need to add facilities to increase offering types for recreation
- No indoor buildings to teach gymnastics and dance
- On weekends, especially Saturday, there could be walking tours for the older residents who are able, but don't feel secure about going by themselves.
- outdoor exercise equipment would be a great asset.
- People are more likely to use facilities when there is a guide, program or event.
- Social media is so important these days and we need to do a better job of reaching these people.
- we are developing park now. informing people as improvements are made
- We have a Sports Park that the average citizen cannot use. No baseball practice fields, no playgrounds, etc.

If you selected access upgrade as one of your top three priorities to focus on to increase outdoor recreation participation, please describe the location and desired improvement.

- It is a building that was built 1989 and in 2008 after being named a second room was added, but need extra work. as president
- More sidewalks and bike trails connecting the recreational facilities
- Most lands are under private hunting leases, so little public access to launch small canoes or fishing boats, except by private run canoe companies along the Ouiska Chitto Creek. None along the Calcasieu.
- N/A
- Needed facilities
- perimeter fencing does not have gates or access points ,
- Too dangerous to get to my bike or foot
- Welcome sign at gate and finding someone to open/close gate everyday at dawn to dusk.

If you selected facility maintenance as one of your top three priorities to focus on to increase outdoor recreation participation, please describe the location and desired improvement.

- better floors
- broken equipment may be addressed by fixing, barricading or removal, slow to add replacements
- budgetary constraints result in deferred maintenance
- general maintenance is limited because of funding source
- grant money only covers construction costs rec districts have trouble meeting increased demand without raising taxes
- improve trails for ADA accessibility
- Inadequate maintenance budget: too few personnel and too little funding for parts and repairs
- N/A
- Nature Centers/ parks need to be upgraded and changed over time. There needs to be a budget to upgrade on a recurring plan
- Picnic areas at a few points along the rivers and creeks are poorly maintained and if broken tables exist, not repaired.
- Replacement of access doors, paint, general maintenance items
- the cleaning is done by family for a small fee.

If you selected added/new improvements as one of your top three priorities to focus on to increase outdoor recreation participation, please describe the location and desired improvement.

- 90 years old out dated
- A blueways trail accessed by several of our parks and boat launches
- A room was added, but need the outside of building upgraded
- A State Park located along the white silica sand bars of Calcasieu River near the center of Allen Parish (along State Hwy 26) would add economic benefit to the parish and add structure and regulations where none currently exist. This creates a hazardous situation where drinking, cars and guns are often present where families and small children often want to play in the water.
- ADD MORE RECREATION PARKS
- Addition of new areas to be visited
- bike paths
- city hall park needs new playground equipment
- CITY PARK NEEDS WALKING TRAILS
- community meetings needed to determine the public's preferences in new improvements
- DeSoto Park Trail
- Difficult to respond to trends due to long lead time for improvements and displacement of current/traditional facilities
- extended walking path/bicycle path, covered areas, restrooms, exercise equipment
- In the communities I serve there is an abundance of land, which is appropriate for trail systems, but the land is private property and would need to be obtained to become public offerings.
- Indoor air conditioned facility to teach dance and gymnastics
- Lake Arthur Park and Water Front-to replace and improve deteriorated structures
- Modernize facilities that have been in place long term and the technology had surpassed the aged exhibits
- More or newer equipment
- Natural play area for kids
- need more jogging trail and bike trails in our area
- Needed funds for new improvements
- New ball fields and continuation of existing walking trails
- New sports complex (baseball, football, soccer
- Project currently in process to upgrade local park to include a splash park, playground, and skate park.
- renovate more facilities
- Research our community for activities that would interest a wide array of citizens
- Residents want a public fishing lake, walking trails and bike paths to be built
- Signage and public tent (low impact) tent camping is needed at Evangeline State Park
- signage and restroom facilities
- The budget to add to current recreational facilities
- The local community is very tight and often fails to realize there are bigger and better opportunities available. As such, funding for renovations and upgrades are seldom available, including being allowed to seek grant assistance.
- There are a number of improvement our projects crew is working on. We need to make sure that we are
 actively working to meet the needs of our community and their wants. Their needs and wants are everychanging.

If you selected added/new improvements as one of your top three priorities to focus on to increase outdoor recreation participation, please describe the location and desired improvement.

- Unlocked open baseball fields for public use. Public fishing pond(s) for families to enjoy. Increase
 playground equipment and add locations. Summer time activities/facilities for families(besides paid for
 summer camps for kids only).
- updated playground equipment, cabins
- we are in desperate need of new facilities to offer new activities
- We have a lot of older parks that require a lot of upgrades
- We have a public pond, needs to be stocked. Playground equipment.
- We want to diversify the facility
- We would like to provide at least a spray park

If you selected other as one of your top three priorities to focus on to increase outdoor recreation participation, please describe the location and desired improvement.

- A master plan of the city's recreational and cultural facilities
- Expressway Park lighting
- Need concessions stand at 4H arena which is a multi-purpose facility, and would grow into more uses for the public.
- Promote and market the facility in local newspapers/newsletters/Face Book page.
- Trails should be clearly marked and include distances.
- We have great success with community involvement, public build activities, need more community to volunteer as park monitors and programming assistance

Do you have any additional comments you would like to provide about outdoor recreation in Louisiana?

- Allen Parish has 2 scenic rivers with beautiful white sandy beaches. However, the only public access to the
 white sandy beaches is at the river crossing of La. Hwy 26 at the Calcasieu River and the Ouiska Chitto River.
 There is no structured activities or rules that monitor the glass, drinking, or parking and this has been the
 site of some bad behavior. Seems that the crossing at the Calcasieu Bridge would make an ideal State Park
 with camping, RVing, and family activities including swimming.
- As a rule, the state parks and recreations around the state are clean and well run and maintained. This takes
 a lot of effort and funding on the state's part, but it is a facet of our state that many visitors enjoy the most.
 Allen Parish has two well known scenic streams, but only one offers private canoe opportunities for summer
 recreation (Ouiska Chitto Creek). The Calcasieu River between Oakdale and Kinder has beautiful white silica
 sand bars up and down the river, but not a lot of public access except at the State Hwy 26 bridge just west of
 Oberlin. That large sandbar is very popular in the summer, but not well maintained and no regulations. It
 would seem to be an ideal site to locate a State Park in view of the expected population growth in the next 5
 years in conjunction with industrial development in Southwest Louisiana. Hwy 26 is also a recognized state
 biking route thru the state and the biking path crosses at that Hwy 26 bridge as it continues on through Allen
 Parish.
- Development of outdoor recreation in Louisiana must become a top priority for the state known as the 'Sportsmans Paradise'. This will require much more funding being available for local agencies to access.
- Fishing and hunting, rodeo, 4H are important aspects for rural America. Activities need to be addressed differently than from urban areas.
- Focus educational programs and activities for greater awareness of importance of outdoor recreation facilities.
- Having an indoor, air conditioned facility in West Feliciana Parish would fill a void and would improve WFPR reach for more participation.
- I want to commend those responsible for the state park system. I recently rented a cabin at North Toledo Bend state park and I was extremely impressed with the cleanliness and maintenance of the entire park! Keep up the great work!
- MANY SMALL TOWNS DO NOT HAVE ADEQUATE FUNDS TO PROVIDE THEIR RESIDENTS WITH THE VARIETY OF FACILITIES FOR RESIDENTS, ALL WE HAVE IS A PLAYGROUND AND A FEW PICNIC TABLES. WE WOULD LOVE TO AFFORD BIKE TRAILS, WALKING TRAILS, COURTS, AND SKATE PARK BUT NOT POSSIBLE
- * More rentals must become available. Water ski, boats etc are hardly accessible unless one knows someone
- N/A
- No
- Our agency is happy to provide advice to others about managing habitats for birds and providing features and trails for bird watchers.
- Our outdoor state recreation resources are under-utilized.
- Outdoor recreations is great, but it's hard on a small community with a limited budget. We have a great facility, but needs more activities.
- Public land is essential. Access to safe, low-impact recreation along bayous is important to improve and increase the paddling economy. Multi-lingual signage is important including Cajun French and Chitimacha languages.
- Thanks for letting us give input

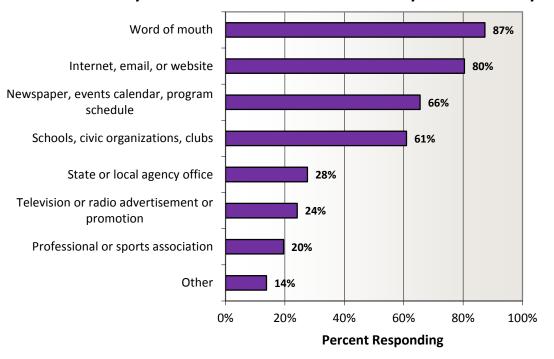

Do you have any additional comments you would like to provide about outdoor recreation in Louisiana?

- The Ouachita Parish Police Jury as a body does not collect any tax dedicated for recreational purposes.
- The parish is working to expand and improve boat access, the general public perception is that the number, location, and quality of boat launch facilities is inadequate.
- There needs to be more services provided to the rural areas of the state. You hear of lots of new activities
 and facilities being built in and around the major cities, but it seems to be assumed that families in the more
 rural areas have more access to outdoor activities. The fact is that most of that land is own by private
 citizens and the general public does not have access to it. I would like to see more hunting and fishing
 services provided that focus on getting kids involved. Just because families live in a rural/country area, it
 does not mean they have easy access to places to bring their kids to enjoy the outdoors.
- This survey only includes North LA Refuges Complex in Northeast Louisiana
- We are in the planning stages of building a new 'one site' sports complex
- We are located in an area where there is little concern about the need for children to have a safe haven after school.
- We have been successful in past years working with Office of State Parks on grant applications and other
 programs and we appreciate it and look forward to more future partnerships and successes. I would like to
 find out more about other programs the State offers as I don't want to leave any stone unturned when it
 comes to funding sources. Do you host workshops to review programs and how to participate for
 jurisdictions and agencies?
- WE NEED MORE OUTDOOR RECREATION FOR THE CHILDREN
- With a few exceptions, it appears that on the local levels most communities are 20 years in arrears of the rest of the country as it pertains to recreation facilities and programming. However, on the State level, it appears that efforts are ongoing to ensure Louisiana has some of the best state parks in the country.

NOTE: The purpose of this outreach was to gain insight into local and parish facilities and community needs. Based on some of the providers' responses, that purpose was not clear. The comments about state parks were not very pertinent to this survey because state park facility providers were not polled.

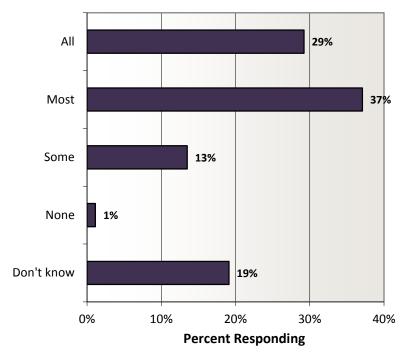

In the future, efforts to more clearly communicate the purpose of this outreach should be made.

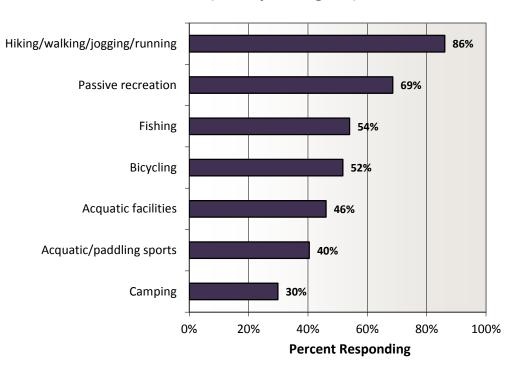

How do you communicate with residents in your community?

Portion of Public Recreation Places that Meets ADA Standards

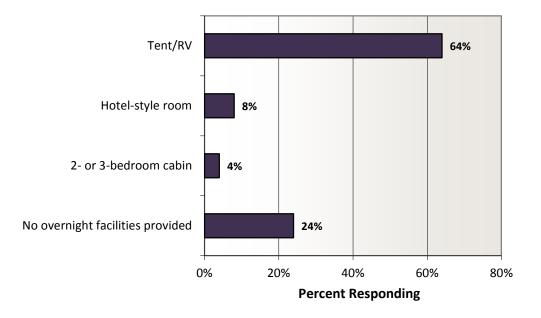

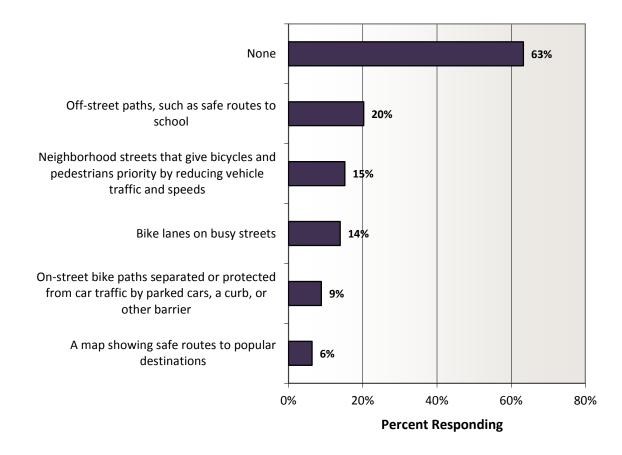

Opportunities, Facilities, or Amenities Provided by Agency (% Responding Yes)

Overnight Lodging Facilities

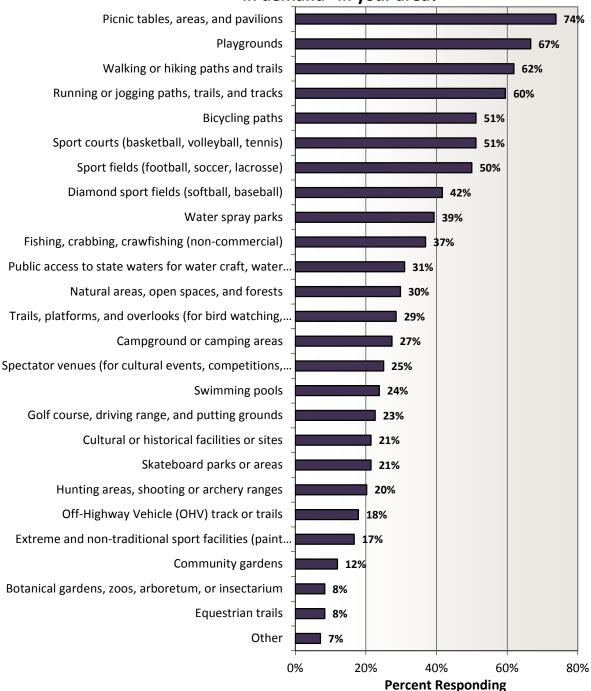

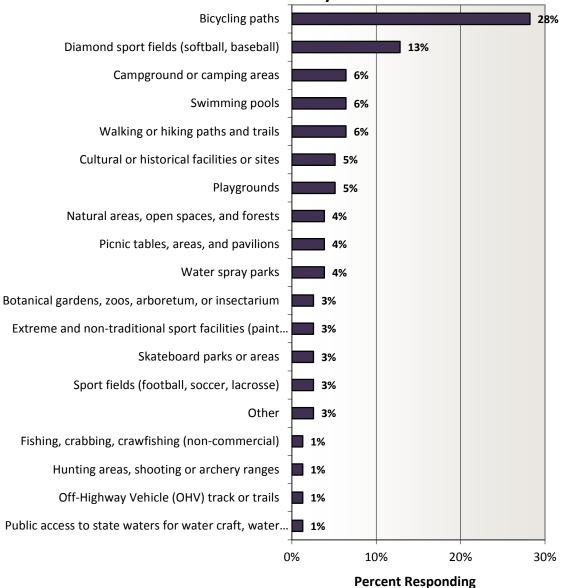

Bicycling Amenities Provided

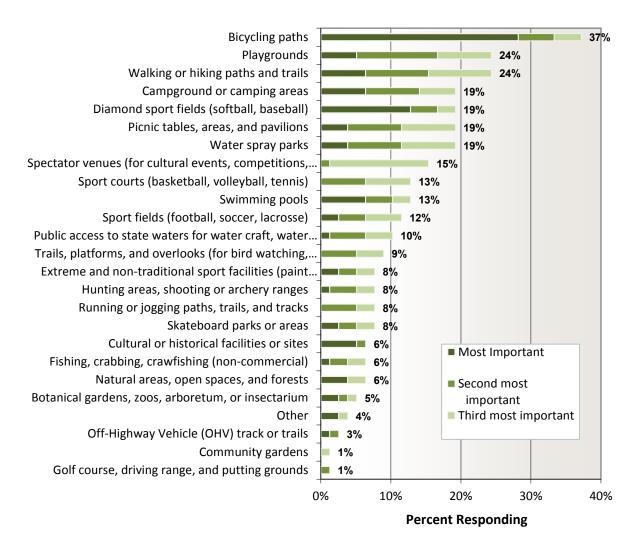

What facilities or natural resources would you consider most "in demand" in your area?

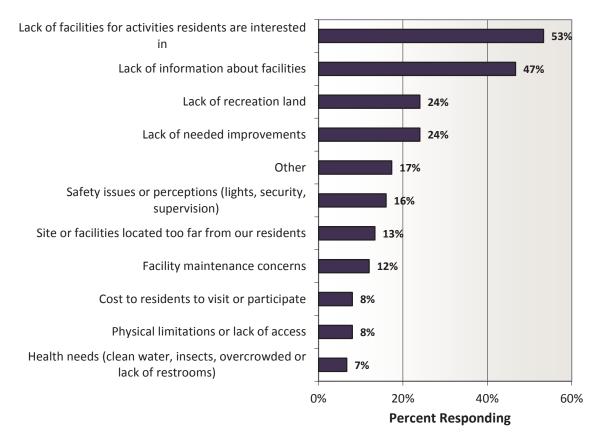

What facilities or natural resources would you consider most "in demand" in your area?

APPENDIX F. ACTIVE LIVING RESOURCES

Active Living Resource Center (<u>www.activelivingresources.org</u>)

The ALRC web site provides lots of resources used across the country to make positive changes in their communities. Brochures, how-to documents, and other resources, including staff support, are available.

Bicycle Pedestrian Information Center (www.pbic.org/engineering)

The Pedestrian and Bicycle Information Center (PBIC) is a national clearinghouse for information about health and safety, engineering, advocacy, education, enforcement, access, and mobility for pedestrians (including transit users) and bicyclists. The PBIC serves anyone interested in pedestrian and bicycle issues, including planners, engineers, private citizens, advocates, educators, police enforcement, and the health community.

League of American Bicyclists (<u>www.bikeleague.org</u>)

The League of American Bicyclists is the oldest bicycling organization in the US. LAB promotes cyclist education for all ages through training workshops, and advocates for better facilities for bicyclists.

Rails to Trails Conservancy (<u>www.railstotrails.org</u>)

The purpose of Rails-to-Trails Conservancy (RTC) is to enrich America's communities and countryside by creating a nationwide network of public trails from former rail lines and connecting corridors.

National Complete Streets Coalition (<u>www.completestreets.org</u>)

Provides workshops and resources for safer and inclusive street design.

Association of Pedestrian and Bicycle Professionals (<u>www.apbp.org</u>) is a membership organization that offers frequent webinars on bike/ped design, and hosts an active listserv.

Safe Routes to School National Partnership (<u>www.saferoutespartnership.org</u>)

An extensive resource for everything from International Walk to School Day, to research and reports on topics relating to school travel, to curricula for bicycle and pedestrian education in elementary school.

National Center for Safe Routes to School (<u>www.saferoutesinfo.org</u>)

The official information and technical assistance clearinghouse for FHWA's Safe Routes to School Program.

Cities for Cycling (nacto.org/cities-for-cycling/design-guide)

A project of the National Association of City Transportation Officials (NACTO), CFC has produced an Urban Bikeway Design Guide featuring innovative design treatments for accommodating cyclists in congested urban areas where competition for pavement is high.

USDOT Office of Livability (<u>www.dot.gov/livability</u>)

Coordinates the efforts of its many agencies to ensure that transportation investments help build communities and improve quality-of-life. The website includes links to grants, research, case studies, and the Partnership for Sustainable Communities (DOT, HUD, EPA).

FHWA Bicycle and Pedestrian Program (www.fhwa.dot.gov/environment/bikeped/index.htm)

Includes information on the amount of Federal bike/ped funding apportioned to each state since 1992; FHWA guidance on the accommodation of bicyclists and pedestrians on Federally funded transportation projects; non-motorized Pilot Program lessons learned; international best practices for bicycle and pedestrian facilities.

FHWA Recreational Trails Program (www.fhwa.dot.gov/environment/rectrails/index.htm)

Includes: guidance on technical design; reports; a directory of state RTP administrators; a database of RTP projects completed since 1993.

FHWA Transportation Enhancements Program (<u>www.fhwa.dot.gov/environment/te/index.htm</u>) Includes guidance on the 12 permitted uses of Transportation Enhancement funds, and a directory of state TE program managers.

Pedestrian and Bicycle Information Center (www.walkinginfo.org)

The official information and technical assistance clearinghouse for FHWA's bicycle and pedestrian program. Includes design guidance, a public photo library of facilities, and research.

Appendices

APPENDIX H. VISIONING WORKSHOP RECOMMENDATIONS

| AREA OF FOCUS | 2009-2013 STRATEGIES | STA | TUS |
|----------------------------|--|----------|------------|
| | | RELEVANT | IRRELEVANT |
| Economic | Facilities investments in the next five years at state, regional, and local level should be provided to encourage positive effects | х | |
| Tourism | Environmental resources provide a natural foundation for recreationally-based tourism and should be utilized for recreation activities | Х | |
| | New facilities, improvements, and upgrades should focus upon innovative and/or environmentally sensitive recreational ideas and activities that inspire people of various ages and ability levels | х | |
| Innovation | Innovative examples include, but are not limited to: providing for activity variety, utilizing green building principles and techniques, educating users in an inspiring way about the environment, developing inspirational activities for disabled users | | х |
| Community Outdoor | Local and parish governments provide most of the state's outdoor recreation facilities with the least amount of land, thus land acquisition in communities for outdoor recreation is a strategy to promote community outdoor recreation | | х |
| Recreation | Funding for more community recreation facilities is important to ensure quality of life to Louisiana's citizens, promote healthy living, and encourage environmental stewardship | х | |
| Trails | All types of trails should be considered and developed: urban corridor trails, multi-use trails, scenic trails, OHV trails, nature trails, dedicated use trails, levee trails, and rail-trails | Х | |
| | Coordination with these major planning efforts and their established state information, goals, and priorities is integral to maximizing recreation benefits | х | |
| Cooperation & Coordination | Continued development of the Louisiana Recreation GIS database initiated for this SCORP is highly recommended as a strategy to support cooperation and coordination | х | |
| | Continued outreach and education to recreational providers is also important in establishing a statewide comprehensive recreational system | x | |

| REGIONAL PRIORITIES | 2009-2013 RECOMMENDATIONS | STA | TUS |
|------------------------|--|----------|------------|
| | | RELEVANT | INCOMPLETE |
| Region 1 | Effectively identify and meet community recreational needs Utilize innovative and sustainable design methods | Х | x |
| Region 2 | Access and utilize Louisiana's natural resources for recreation Connect state and parish recreation Identify realistic community needs | Х | х |
| Region 3 | Identify and coordinate community recreation opportunities among multiple jurisdictions (support facilities for existing rereation facilities) Utilize recreation facilities as an economic generator and quality of life attractor Market existing recreational opportunities | х | х |
| Region 4 | Investigate opportunities for additional funding for maintenance and operations Create a culturally appropriate and long term recreation vision Provide safe access to recreation | х | х |
| Region 5 | Acquire additional funding for recreation and property acquisition Service rural residents Provide professional and technical support to local jurisdictions | х | х |
| Region 6 | Create a comprehensive park system master plan to determine necessary services and eliminate duplication of services Additional funding for maintenance and operations | х | х |
| Region 7 | • Create comprehensive community park systems that are well funded, valued by local citizen and policy makers, equipped with facility maintenance standards, and agency coordinated | Х | х |
| Region 8 | • Create comprehensive community park systems that are well funded at all levels, valued by local citizens and policy makers, equipped with long-term educated and trained staff, and integrated with exisiting facilities | х | x |
